WORK EXPERIENCE

Full Stack Developer (part-time)
Live Apps - Coimbatore   **Apr 2023- present**

- Live Apps is an open-source organization where we actively develop and maintain projects with the purpose of learning new technologies and helping others learn as well.
- Actively contributing to the open source project "Kitty chan" to enhance my skills and knowledge as a web developer.
- Kitty chan is a powerful Discord bot, currently serving 1000+ users in 15+ Discord servers, with capabilities for server moderation.
- Responsible for building the frontend for Kitty chan bot using Next.js (Typescript), Tailwind CSS, and Framer Motion.

Freelance Web Developer
Stay Young - India   **Apr 2023- june 2023**

- Built an ecommerce website using Next.js, Tailwind CSS, Nest.js, and MongoDB.
- Utilized TypeScript to enhance codebase maintainability and reliability.
- Implemented server-side rendering (SSR) using Next.js for improved performance and SEO optimization.
- Employed Docker and Jenkins for containerization and CI/CD pipeline setup.

Front-end Developer (Intern)
Skematix Technologies - Coimbatore   **Sep 2022- Apr 2023**

- Worked on 2 projects utilizing frontend technologies such as ReactJS, Next.js, Astro, and Eleventy.
- Developed projects with a well-organized folder structure using Next.js framework and gained proficiency in state management libraries like Redux.
- Managed implementing my own design ideas with Tailwindcss for theming and reusable components.
- Strengthened teamwork and communication abilities through collaborative project work.

Front-end Developer (Intern)
Webilicious - Salem   **Jan 2023**

- Developed the user interface for an ecommerce website using React.js and Tailwind CSS.
- Acquired end-to-end project management skills, encompassing all stages from initial planning to deployment on cloud platforms such as Vercel and Netlify
- Gained valuable experience in version control using Git and GitHub while working collaboratively with a team.
- Successfully implemented the agile methodology, contributing to efficient project management and timely delivery.

Back-end Developer (Intern)
Neophron Technologies - Erode   **July 2022**

- Responsible for backend development using popular technologies including Node.js, Express.js, and MongoDB.
- Utilized Postman for API testing and documentation.
- Successfully developed a REST API and gained a strong understanding of API development fundamentals.
